**ATM RAMINATOR APPOINTS SECURITY CENTRE
(IRIS DIGITAL VIDEO SYSTEMS) DALLAS**

USA distributor for ATM Raminator has finally been appointed.

Richard Gould CPP, Director of Lockit Systems (Aust) and inventor of the multi award winning ATM Raminator says. “It was a great result to appoint The Security Centre (IRIS Digital Video Systems) Dallas (Texas) as we wanted to find a company whose security and management values reflected our beliefs. Having a good core of ‘security’ savy employees rounds off our decision to appoint The Security Centre Dallas.

Security Centre Dallas is a veteran-owned, family-owned, “banking oriented security supplier” with a long and well established reputation for nationally distributed security products which genuinely raises the security standards of banks and credit unions.

Being members of the FSPA (Financial and Security Products Association) and ATMIA (ATM Industry Association), and backed by over 45 years in banking and financial services, makes ATM Raminator and Security Centre Dallas a perfect fit.

“In just 3 months we have begun to send ATM Raminators into USA and we are seeing a stream of USA supported distributors starting to make sales of ATM Raminator.”

Numerous state banking associations immediately endorsed the ATM Raminator and insurers of ATM's are now offering discounts on insurance for fitting ATM Raminator.

The beauty of ATM Raminator says Gould “It's a once off purchase which delivers many years of security and is cheaper than many alternatives and directly saves both property repair costs and ATM cash and replacement, has no electronics or moving parts and is 100% recyclable at end of life.”

“ATM Raminator has retained every ATM attacked with our system fitted and ‘Smash & Grab’ in Australia has dropped by 95% since it was introduced, thieves have given up stealing ATM's because of ATM Raminator.” says Gould.
