

FOR IMMEDIATE RELEASE

IRIS DIGITAL VIDEO SYSTEMS ANNOUNCES NEW DIGITAL VIDEO RECORDER OPTIONS

New Proprietary Software Allows Use of Analog and IP Cameras

October 2010

Dallas, Texas – IRIS® Digital Video Systems has announced it has begun manufacturing and marketing a “hybrid” version of its industry-leading digital video recorders that can utilize a mix of up to 32 analog and IP cameras. “We are excited to offer this option to our dealers and distributors,” states Charles Dozier, president of IRIS. “We had begun receiving calls almost daily asking for this option on our systems – we have again responded to our customers’ needs,” he continued to say.

While their standard DVR FX-systems will accept both analog and I.P. camera input, the company also offers IP-only NVR (Network Video Recorder) versions. IRIS offers a desktop/rack-mount *DVS-FX*, a wall-mount unit with TouchScreen interface *TotalVision-FX*, and its new *ATM SiteWatch* which is an I.P.-based recorder designed for use with stand-alone ATMs. Both the *DVS-FX* and *TotalVision-FX* products are available in 16 and 32 (analog) video input channels.

IRIS specializes in capturing transactional information and associating such with the recorded images. IRIS’ Inquiry image retrieval software allows the user full control over how to retrieve images, by time, date, transaction information, and more; and, allowing easy export for evidentiary and law enforcement purposes. Its patented technology is licensed to other manufacturers.

The systems will continue to be able to utilize “through the lens” ATM light monitoring plus motion detection and motion recording. IRIS also manufactures covert Sign and Tower Cameras for use at a teller or cashier positions.

About IRIS Digital Video Systems – IRIS (Image Retention and Information Systems) was among the first in the electronic security products industry to design and manufacture digital video recorders. IRIS markets its products through an ever-growing national distributor and dealer network. Its parent company, The Security Center, was founded in 1963, and continues to market physical and electronic security products to financial and commercial business throughout Texas and nearby states. It remains a veteran-owned family-run business. The Security Center is also the U.S.A. Distributor for the ATM Raminator® line of ATM anchoring products, a proven method against ram-raid attacks.
