

IRIS DIGITAL VIDEO SYSTEMS

i.p.
cameras &
encoder

IRIS Digital Video Systems introduces a series of camera and encoder products to complement its new I.P. DVRs. IRIS has taken its extremely popular *Sign* and *Tower* Cameras and added circuitry to allow use with its new *FX-Series* of Hybrid and I.P. DVRs. These *Cameras*, as well as the new "Mini" ATM Camera, are the perfect solutions for total customer site installations.

If your installation situation requires a combination of "new" I.P. cameras to use with existing "conventional" analog surveillance cameras, then the IRIS Analog-to-Digital Encoder is the solution. The *Encoder* allows use of almost any existing standard analog surveillance camera with the IRIS *FX-Series* Hybrid or I.P. DVRs, saving precious budget dollars.

ATM Mini Camera
and Encoder

Key Features

- Designed for I.P. installations, including IRIS *FX-Series* of Hybrid and I.P. DVRs
- Avoid the use of costly coax cabling
- Analog-to-Digital *Encoder* allows use of most (standard) analog cameras with the IRIS *FX-Series* of Hybrid and I.P. DVRs
- Capture up-close and high-detail images preferred by law enforcement agencies
- 620 lines of resolution
- Wide dynamic range option for difficult lighting situations
- Sharp 3.6mm lens
- Variety of Camera housings: IRIS *Sign*, *Tower*, and *Mini*
- *Mini* housing perfect for in-ATM mounting
- IRIS' ATM environmental light monitoring and reporting features maintained when using IRIS's *FX-Series* DVRs
- Blends into environment - shape, color, and mounting options make cameras unobtrusive
- *Sign* and *Tower* Cameras available in wood-grain finishes to match any décor
- Video and power connections, and mounting bracket included
- Two-year product depot warranty provided by IRIS
