

Has been appointed a USA distributor for the World's most innovative security system for ATMs. – Richard Gould

An ATM safe under repeated ram attack test. The safe remained attached to the Raminator.

Designed and manufactured by Lockit Systems (Aust) Pty. Ltd.

Patent App – PCTAU/2007/000291

Another ATM safe ram attack test. The safe remained attached to the Raminator.

Australia suffered a major escalation in ATM RAM RAIDS (Smash and Grab) from 2005 to 2007. Some 130 ATM Smash and Grab attacks in ONE city alone in a 12 month period. The common form of attack is using a stolen 4WD (SUV) to remove the ATM from the floor fixings. A few burly men throw the ATM into a waiting stolen van and all are finished and gone in just a few minutes.

Stealing ATM's in the USA is just as simple, from a chain pull-out, prying from the floor, or vehicle impact, the ATM and cash are gone in seconds leaving thousands of dollars of damage, irate business owners, and devaluing your good customer's name and reputation.

To date we have saved every ATM attacked, Ram Raids have dropped by 95%, and 6 of the 7 major banks in Australia use ATM Raminator on ATM's deemed exposed to vehicle attack.

OUR 3 'R's of ATM security are...
RESPOND – Design a system to challenge the criminal's ability.
RETAIN – Do the utmost to keep the ATM on site.
REVIEW – Learn from Ram Raids and improve designs.

By nature thieves are OPPORTUNISTS and the call of easy money and reminders in the media of successful thefts creates copycatting and a rise in numbers of theft attempts. By improving the ability to retain the ATM, the "easy mark", and with good policing you can change thieves' risk vs. reward perception. With the current economy one can only imagine how desperate these thieves will become.

It is sobering to think it can cost around \$120,000 per Ram Raid. Our solution of retaining the ATM provides an improved outcome for ATM machine manufacturers, owners, shopkeepers and bankers.

Why wait to lose more ATMs when a simple and secure solution is now available here in the USA? Installation is quick and easy!

Contact Gary Akey today at 888.451.4646 (office) or email gakey@securitytexas.com to receive information, and/or support material making ATM "Smash and Grab" a thing of the past.

The Security Center is a Member of the Financial and Security Products Association

Raminator is winner of the 2007 ATMA and 2007 ASIAL awards.
