MODULAR VAULT PANELS

MODULAR VAULT PANELS

Our Vault Panels are manufactured to strict U.L. standards ensuring consistency during the manufacturing process and in the finished product. Panels are used for walls, ceilings, and floors. General contractors can apply a finish to both sides of the panels after installation. Multiple room or multiple floor "custom designs" are available, as well as ventilation ports and sprinkler access options. Panels can be removed to relocate to another facility or allow expansion of an existing vault installation.

FEATURES MAY INCLUDE:

- Manufactured to strict U.L. 608 standards.
- Lightweight modular Vault Panels allow transport in freight elevators, and installation on above-ground floors.
- Panels allow for expansion or remodeling of existing vaults.
- Conduit access is a standard feature.
- HVAC ventilation port(s) optional.
- Sprinkler access is optional.
- Ask about our custom designs!

Class	Concrete Modular		Lightweight Modular	
	Typical Thickness	Typical Weight	Typical Thickness	Typical Weight
M	4"	53 lbs/ft ²	3 1/2"	19 lbs/ft ²
1	5"	69 lbs/ft ²	5 1/2"	25 lbs/ft ²
2	8"	108 lbs/ft ²	9 5/8"	40 lbs/ft ²
3	15"	205 lbs/ft ²	14 1/2"	58 lbs/ft ²
